

Technical Sheet

Series of side tables with different forms, dimensions and patterns, available as single items or grouped by two or three.

Structure: ceramics decorated by hand.

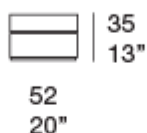

Notes: the side tables are decorated by hand by maestro Nicolò Morales, who works with colours sometimes more transparent, sometimes thick and textural. The material, the particular handwork and the production technique lead to colour and design differences between tables, even from the same lot and typology. The irregularity and the uniqueness of each item are the featuring characteristics of this series.

The product can be used also in interior environments.
